#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 101

1. Claims 8-14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims, as currently written, lack usefulness. Claim 8 recites the steps of providing a media player, an advertisement, and a tracking subsystem as part of a method for manufacturing a media and advertisement player. The steps are directed to providing pieces that could be assembled at some point. However, the claimed pieces are never made operational and never interact with one another. They are simply parts waiting for assembly and once assembled have the capability to interact with one another as claimed.

### Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 2-7 recites the limitation "The player". There is insufficient antecedent basis for this limitation in the claim. Claim 1 from which these claims depend identifies both a media player and an advertisement player. It is unclear as to which player claims 2-7 are directed towards.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Radziewicz et al (U.S. Patent Number: 5,854,897).

Claim 1. Radziewicz discloses a media and advertisement player, comprising:

- b. An advertisement player that receives advertisements and a corresponding advertising schedule from said remote system via said computer network and plays said advertisements according to said advertising schedule. (Col 7, lines 18-54)
- c. A tracking subsystem that generates as-run logs containing records of a playing of said media and said advertisements and transmits said as-run logs to said remote system via said computer network. (Col 9, lines 24-41)

Claim 2. Radziewicz discloses the player as recited in claim 1 further comprising a display that presents a graphical user interface. (Col 5, lines 22-42)
